## SHADE AND ORNAMENTAL TREES

**CHINESE ELM**—More Chinese Elm are being planted in Colorado than all other variety of forest trees combined. They have proven superior for planting in dry locations and grow rapid even in poor soil. Our advise is not to water after August 15th. If trees are in the lawn, sprinkle surface light and keep grass green. Chinese Elm will survive in dry locations where other trees will fail.

Prices are for straight, stalky, well-trimmed trees.
